

generate originally filed Figure 6 and erroneous data was entered into the program (See Declaration of William R. Barclay, paragraph 8).

The specification has been amended to reflect that ATCC Accession 20890 and 20892 now appear to fall within the taxonomic classification of *Thraustochytrium* rather than *Schizochytrium*. This amendment is believed to more accurately identify the deposited strains and is a result of greater familiarity by the inventor with the strains since the original filing of the parent application.

All pending claims are believed to be in condition for allowance and the same is requested.

Respectfully submitted,
SHERIDAN ROSS & McINTOSH
